SUMMARY

Software engineer with a proven ability to deliver robust, effective products in collaborative settings under strict and often tight time constraints. Developed many Shopify websites, apps, and microservices, to drive ecommerce operations and analysis for multiple entities, and ultimately facilitated the sale of $20M+ in digital revenue annually. Led the development of a bespoke business process management software focused on delivering curated KPIs in a custom format. Acted as founding developer to bring an MVP based on our product management team's user requirements, and ensured the delivery of quality software on a demanding schedule. Always seeking personal growth, I expanded my coding acumen through a 1,000+ hour coding Bootcamp focused on JavaScript, where I was invited to return as a teaching assistant. I am now eager to tackle more complex challenges and continue to find ways to build solutions for real-world problems.

SKILLS

- **Languages**: JavaScript, TypeScript, HTML, CSS
- **Frameworks**: Node.js, Express.js, Remix.js
- **Libraries**: React, jQuery
- **Databases**: MongoDB, SQL, GraphQL
- **Authorization**: Passport.JS, Bcrypt
- **Testing**: Mocha, Chai, Cypress

In a developer role at your company I will…

- Code within company coding standards and styles.
- Write fully automated code tests in adherence to best practices.
- Learn how to leverage the current CICD pipeline in place.
- Build responsive frontend designs to spec per the UX design.
- Build out API routes per RESTful design structure.
- Diligently prioritize multiple projects to ensure timely results.
- Be coachable and accepting of constructive criticism.

EXPERIENCE

JLB Companies - Software Developer   **Salt Lake City, UT** Dec 2023 - Present

- Lead the development of custom in-house business process management applications, front and back end.
- Was the primary point of contact for our product manager, interfacing between the dev team and management.
- Delivered full stack Shopify solutions using best practice, ensuring a positive user experience.
- Optimized Shopify native reporting features using a custom Shopify app in order to deliver KPIs to a group of business analysts.

TechTAC - Operations Analyst   **West Valley City, UT** Nov 2022 - Dec 2023

- Managed extensive data for a manufacturing company, including a HubSpot CRM, sales and revenue data, product data, and production data.
- Created daily reports using Excel in order to consolidate KPIs for the operations team.

- Drove company budget considerations thanks to revenue data and projections, and reconciled real life data with previous projections to keep our teams on track for 20% revenue growth year over year.

JLB Companies - Software Developer   **Salt Lake City, UT** Nov 2018 - Dec 2022
- Managed the development and deployment of multiple Shopify stores from start to finish, and incorporated necessary apps to meet user requirements.
- Worked closely with the marketing teams to capture customer data, improve user experience, and promote products on a multitude of digital platforms using Shopify product data.
- Created, improved, and maintained a variety of Wordpress marketing websites, focusing on data-centric improvements to increase traffic and maximize user interaction.
- Developed custom Shopify apps in order to achieve our commerce goals and expand the capabilities of the native Shopify platform.

TechTAC - Sales Analyst   **West Valley City, UT** Sep 2016 - Sep 2018
- Led the expansion of our sales network from 15 dealers nationwide to upwards of 350 nationwide.
- Identified expansion opportunities and worked directly with the sales team to provide sales KPIs and monitored our progress.
- Implemented a CRM in order to leverage customer data to increase dealer engagement and expand customer support resources
- Led the development of a digital marketing website and ecommerce website powered by WooCommerce in order to facilitate the sale of products online, and to provide detailed and quality information about our products to engineers across the globe.

PROJECTS
Golf Course Ranker. (https://gcr-7rlp.onrender.com)   **Remote** Dec 2023 - Present
It allows users to rank their favorite golf courses based on a variety of criteria, and then browse courses based on other user's rankings. In building this web-based application, I displayed a working knowledge of HTML, CSS, JavaScript, React.JS, Node.JS, MongoDB, Chai, Bcrypt, JWT, and RESTful methods to develop frontend design, authentication, data management, and the API framework.
- Constructed API following RESTful standards, deploying the tool to Render.
- Addressed authentication and security concerns with the Bcrypt library and JWT tokens.
- Created accessible, dynamic, and responsive front-end design using HTML wireframes, CSS styling, and eloquent JavaScript.

EDUCATION
V School Coding Bootcamp   **Remote** Mar 2024
Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, Node.JS, React, REST APIs, and MongoDB. Created and deployed mobile-first applications while learning new languages and frameworks by collaborating every week with a senior web developer.
